Cop. 2 *Stocks of Grains*

in All Positions

July 24, 1961

## INCREASED STOCKS OF CORN, WHEAT AND SORGHUM GRAIN

July 1 stocks of corn and sorghum grain moved well above the previous record levels and wheat edged moderately above the previous record. Stocks of corn at 2,809 million bushels moved more than a tenth above the record level of the previous year. Sorghum grain stocks of 751 million bushels were nearly a fifth above the record level of last year. The significant increases in corn and sorghum grain along with an increase in oats pushed total feed grain tonnage to a record high of 109 million tons, more than a tenth above a year ago. Wheat stocks moved above the record level of last July 1 with the 1,407 million bushels more than three-fourths larger than average holdings. Rye stocks at 14 million bushels were well above last year and average. Soybean stocks were the lowest since 1957 with 94 million bushels held in all storage positions and flaxseed stocks of 5.4 million bushels were sharply above the record low holdings of a year ago.

Wheat stocks stored in all positions on July 1 totaled 1,407 million bushels and were a record high for the third consecutive year. These carryover stocks were 7 percent larger than the previous year and 81 percent above average. Total stocks were 4 percent larger than the 1960 production with over 90 percent of the stocks either Government owned or under CCC loan. Off-farm wheat stocks of 1,271 million bushels were the largest of record and 4 percent above a year earlier. Stocks of old-crop wheat on farms at 136 million bushels were 42 percent above a year ago and represented the largest carryover on farms since 1943. Disappearance from all storage positions during the April-June quarter was 298 million bushels.

Rye stocks of 14.1 million bushels in all storage positions on July 1 were up 35 percent from a year earlier and were 39 percent above average. Stocks in both commercial and farm storages increased sharply. Off-farm stocks of 9.6 million bushels were 12 percent above last year and 26 percent above average. Stocks of 4.5 million bushels of old crop rye on farms were nearly two and one-half times larger than a year earlier and represented the largest farm carryover since 1944. U. S. total rye stocks amounted to nearly one-half of the 1960 production.

Corn stocks in all storage positions July 1 reached a new high of 2,809 million bushels, exceeding by 11 percent the previous record set a year earlier. Corn held in mills, elevators and warehouses was

777 million bushels, an increase of 13 percent from a year ago. Stocks in all off-farm positions totaled 1,370 million bushels with about nine-tenths owned or under warehouse loan to CCC. Farm stocks of corn of 1,439 million bushels were 11 percent greater than a year earlier. About one-half of the farm stored grains were under CCC loans, including resale and purchase agreements. Total disappearance during the April-June quarter was a record high of 846 million bushels, exceeding the previous high of last year.

Oats stocks in all storage positions on July 1 totaled 324 million bushels, 21 percent above last July and 14 percent above average. Stocks on farms of 267 million bushels were 18 percent above a year ago and off-farm stocks at 57 million bushels were 41 percent larger. Oats owned by or under loan to CCC including resale accounted for about a tenth of the total July 1 stocks. Disappearance during the April-June quarter amounted to 232 million bushels, 6 percent larger than for the same quarter in 1960.

Barley stocks on July 1 at 152 million bushels were 9 percent below a year earlier but 37 percent above average. Farm stocks of 64 million bushels were up 15 percent from a year ago but the 88 million bushels stored off-farms were about a fifth less. More than half of the July 1 stocks were under loan to or owned by CCC including reseals. Disappearance of barley from all storages during the April-June quarter was 93 million bushels.

Sorghum grain stored in all positions on July 1 totaled 751 million bushels, 18 percent above July 1, 1960 and the largest of record for this date. Over nine-tenths of these stocks were owned by or under loan to CCC including reseals. Farm holdings totaled 51.8 million bushels, 17 percent larger than on July 1, 1960. Off-farm stocks, at 699.6 million bushels, were 18 percent larger. Disappearance of sorghum grain during the April-June quarter totaled 105 million bushels, 6 percent less than for the same quarter last year.

Soybean stocks in all storage positions on July 1 totaled 94 million bushels, down sharply from the 136 million bushels on hand a year ago and the lowest for the date since July 1957. Most stocks are in the off-farm positions as farm stocks on July 1 amounted to only 11.5 million bushels.

Stocks on July 1 indicate a disappearance during the 9 month period October 1960 - June 1961 of 488 million bushels from a supply of 582 million bushels (carryover of 23.2 million plus preliminary production of 558.8 million bushels). During the period 317 million bushels were processed for oil and 110 million bushels were exported. Seed and feed amounted to about 35 million. In addition a quantity of new crop beans were crushed prior to October 1, and there is always considerable loss from a crop of this size.

Carryover stocks of flaxseed in all storage positions on July 1 at 5.4 million bushels were more than 80 percent above the record low stocks of 3.0 million bushels a year earlier. However, with that exception the July 1 stocks were the lowest for the date since 1956. Nearly three-fourths of the total stocks were in off-farm positions. Minnesota accounts for 46 percent of the total stocks with most of the balance in Wisconsin and North Dakota.

July 1 stocks indicate a disappearance during the period July 1960 through June 1961 of 28 million bushels from a supply of 33.4 million bushels. During the period, crushings amounted to nearly 20 million bushels, exports 6.7 million bushels and about 2.1 million bushels were used for seed.

Stocks of grains, July 1, 1961 with comparisons  
(In thousand bushels)

1/ Estimates of the Crop Reporting Board.

2/ Owned by C. C. C. and stored in bins or other storages owned or controlled by C. C. C. ; other C. C. C. -owned grain is included in the estimates by positions.

3/ All off-farm storages not otherwise designated, including flour mills and terminal elevators.

4/ Farm stocks not available for July 1 prior to 1956.

5/ Firms reporting crushings and stocks of soybeans to the Bureau of the Census.
